EE/CprE/SE 491 WEEKLY REPORT 2

Start Date – End Date

Group number: 38

Project title: Mobile Hybrid Exploration

Client &/Advisor: David Mcrae and Ashraf Gaffar

Team Members/Role:

Perry
Hunter
Tabe
Mohammed

- ○ **Weekly Summary**

   Our team contacted Buildertrend to see if we could flesh out our project more to make it more suitable for senior design or if we should propose our own project. We believe that our project is too narrow for this class and that the proposal given to us should either be modified or we should be able to choose a different project.

- ○ **Past week accomplishments**

   - **Perry**: Worked on contacting Buildertrend to change our project and helped complete project research for our current proposal.
   - **Tabe**: Helped complete project research
   - **Mohammed**: Worked on setting up the GitLab Environment and discussed with the team how to divide the workload.
   - **Hunter Barton:** Worked on preparing a new project proposal by creating mockups and proposal slides.

NAME	Individual Contributions *(Quick list of contributions. This should be short.)*	Hours this week	HOURS cumulative
Tabe	Brainstormed ideas for new project.	1	2
Perry	Brainstormed new project ideas and talked with Buildertrend about improving the project.	2	4
Mohammed	Worked on setting up the GitLab Environment and discussed with the team how we divide the workload.	2	3
Hunter Barton	Worked on preparing a project proposal by creating mockup, architecture diagram and proposal slides.	4	6

o **Plans for the upcoming week**

- **Tabe**: Start outlining design and improve on ideas for a new project.
- **Perry:** Prepare a plan for the new project and complete product research like we did with our past project.
- **Mohammed**: Will help elicit the software requirement and draw a conceptual business model, which will help with designing the software.
- **Hunter Barton:** Continue to prepare an idea proposal by fleshing out more mockups and diagrams.
